

OF SOUTHEAST MICHIGAN

# 2045 Vision

*Providing the people of Southeast Michigan with seamless mobility services offered by a collaborative network of providers.*

To better meet the needs of the people of the Southeast Michigan region, requires the implementation of a regional mobility vision that seeks to achieve the following:

## Moving R People

- Provides people with reliable, efficient, frequent, and affordable transit services across a core transit network.
- Supports access to jobs, education, health care, special events and other daily needs for people who are more likely to use transit based on ability, age or income.
- Is flexible enough to keep pace with people’s ever-changing needs as it relates to service frequencies and hours.

## Investing in R Future

- Increases the attractiveness of investment in Southeast Michigan by providing sufficient mobility services that employers, businesses, the development community, and the education system can depend upon.
- Supports a talent pipeline in the transportation services sector and other core economic sectors that are needed to deliver mobility services today and into the future.
- Establishes a framework that assures the region is a national leader in the implementation of new mobility services including the deployment of connected and autonomous vehicles.
- Ensures sustainability of existing and expanded mobility services through the year 2045, allowing transit providers and other stakeholders to unlock additional federal and state funding opportunities.

## Enhancing R Quality of Life

- Connects to the abundance of entertainment, parks, open spaces and other recreational activities that exist across the region, giving people more access and mobility choices to live, work and play across the region.
- Makes transit and other mobility services more user-friendly for all people choosing to use.
- Improves bicycle and pedestrian accessibility, giving people more choices to walk, bike and connect across the region.
- Improves the economic stability of the region and adds potential for more growth.

## Connecting R Communities

- Eliminates existing mobility deserts and connects people in communities across the region with new transit and mobility services that today are often very limited.
- Leverages the region’s existing transportation assets, including the world-class Detroit Metropolitan Wayne County Airport to allow more people to connect to and through our region.
